Spontaneous Process A

spontaneous process is one that occurs on its own, without any energy input from the outside. Spontaneous Process Definition and Examples A spontaneous change may be so rapid that it is essentially instantaneous or so slow that it cannot be observed over any practical period of time. To illustrate this concept, consider the decay of radioactive isotopes, a topic more thoroughly treated in the chapter on nuclear chemistry. Spontaneity | Chemistry Life - Life - The origin of life: Perhaps the most fundamental and at the same time the least understood biological problem is the origin of life. It is central to many scientific and philosophical
