global climate system. Coverage includes original paleoclimatic, diagnostic, analytical and numerical modeling research on the structure and behavior of the atmosphere, oceans, cryosphere, biomass and land surface as interacting components of the dynamics of global climate. Climate Dynamics | Home Climate and Atmosphere-Ocean Dynamics. Broadly speaking, our research is focused on large-scale climate dynamics. Specific areas of active research include: large-scale atmospheric and oceanic dynamics, ocean-atmosphere interaction, atmospheric convection, coupling between clouds and climate, boundary layer processes, tropical cyclones, general circulation modeling, coupling between polar regions and global climate, and the role
