23 MCQ by Urvi Trivedi - Issuu

Healthcare workers can be protected from such diseases as measles, chicken pox, and hepatitis B by getting a vaccine. A vaccine is a weakened or dead version of an infectious agent that is injected into the body. The body develops a way to fight off the disease in the future and is protected, or immunized, for life.

Apple iPhone charger teardown: quality in a tiny expensive

Since the controller IC needs to be powered up before the transformer can start generating power, you might wonder how this chicken-and-egg problem gets solved. The solution is the high-voltage DC is dropped to a low level through startup power resistors to provide the initial power to the IC until the transformer starts up.
