Used High Pressure Die Casting Machines

and Equipment For Sale Die casting is a metal casting process that is characterized by forcing molten metal under high pressure into a mould cavity. The mould cavity is created using two hardened tool steel dies which have been machined into shape and work similarly to an injection mould during the process. Most die castings are made from non-ferrous metals, specifically zinc, copper, aluminium, magnesium, lead, pewter, and tin-based alloys. Depending on the type of metal being cast, a hot- or cold-chamber machine is Die casting - Wikipedia This is our ultra high-speed die casting machine lineup that we are proud of. CS Series This series is mainly used in production of large sized die castings such as automobile parts. DEC Series (Hybrid Die Casting Machine) This is our environment friendly die casting machine lineup. Die Casting Machine [SHIBAURA MACHINE] The machine has the capacity to cut across fabrics at a speed 90% faster than ordinary scissors.
