Electronic resources were selected based on results of an informal survey suggesting that the four electronic resources are most commonly used at health care institutions and ... Evaluation of resources for analyzing drug interactions Recognition and management of drug-drug interactions (DDIs) is critical to providing efficacious and safe anticancer treatment. DDIs with QTc-prolonging agents, anticoagulants, enzyme inducers and inhibitors, antidepressants, and acid suppressants are commonly encountered with

anticancer therapies. Oral Anticancer Therapy: Management of Drug Interactions ... Occasionally drug interactions result in obvious adverse outcomes. A study of 1000 older patients admitted to a hospital geriatrics unit identified 894 patients who were receiving two or more drugs. Although a majority of these patients were receiving potentially interacting drug combinations (60% of the patients), only about 15% of them had symptoms of an adverse drug interaction on admission. It is important to remember that these adverse drug interactions are predictable and, therefore ...
