14405-2:2011 illustrates the use of geometrical tolerancing for dimensions that are not linear sizes to avoid the ambiguity that the use of \pm tolerances on these dimensions causes. Both linear and angular dimensions, except size of features of size, are covered. Dimensional tolerancing can be indicated by \pm tolerancing or geometrical tolerancing. 14405-1 is right below the ISO 8015
basic standard in the GPS hierarchy
and represents the main standard
for geometric dimensioning and
tolerancing. It establishes the
default specification operator - thus

the default drawing indication – for linear size and provides options to modify this default specification operator. Abstract ISO 14405-1:2010 establishes the default specification operator for linear size and defines a number of special specification operators for linear size for feature of size types “cylinder” and “two parallel opposite planes”. It also defines the specification modifiers and the drawing indications for these linear sizes. ISO - ISO 14405-1:2010 - Geometrical product ... Introduction. This part of ISO 14405 is a geometrical product specification (GPS) standard and is to be regarded as a general GPS standard (see ISO/TR 14638). In the general GPS matrix, it
