material handling equipment | M&M
Equipment Corp Material handling
equipment is mechanical
equipment used for the movement,
storage, control and protection of
materials, goods and products
throughout the process of
manufacturing, distribution,
consumption and disposal. The
different types of handling

equipment can be classified into four major categories: transport equipment, positioning equipment, unit load formation equipment, and storage equipment. Material-handling equipment -

Wikipedia Material handling equipment is used to move, store, or ship items efficiently. Conveyor systems reduce the effort it takes to move heavy or bulky materials from one location to another.

Shelving and storage racks help to keep tools, materials, and supplies organized and accessible in commercial and industrial facilities. Material Handling
