The network architects and analysts use it to document the new network changes, and it serves as documentation for the enterprise. How to design network | Eight step design methodology ... Software-defined networking (SDN) is an emerging technology focused on replacing the physical network infrastructure with a software-controlled networking design. It's dynamic, cost-efficient, and adaptable, which means that it caters to the high bandwidth needs of modern applications with aplomb. Secure Network Architecture Design - Infosec Resources It's basically the physical and logical design which refers to the software, hardware, protocols
