Paint Spray Booth Design Guide In crossdraft and semi-downdraft paint booths, the exhaust plenum is located at the rear of the spray booth. In side downdraft paint booths, filtered exhaust plenums are located on both sides of the spray booth. When air reaches the floor in downdraft paint booths, it is exhausted through a filtered exhaust pit. The pit may consist of one, two or three rows. Understanding Key Components of Paint Booth Design Spray booth design is a key element. Airflow direction, filtration, velocity and balance are critical to accomplishing the desired quality level. A pressurized downdraft paint booth typically produces the highest quality paint finishes for automotive applications, whereas a non-pressurized crossflow spray booth has the lowest potential for a high-quality paint job. Spray Booth Design - Finishing Academy The paint spray booth is designed primarily to contain paint overspray. Overspray results when paint spray misses its target. Fine particles are suspended in the air-and if they are not controlled, they can cause damage. Overspray creates three main hazards which can be avoided if the paint booth is working correctly. Paint Booth Maintenance Guide - P2 InfoHouse The size air conditioner you will need will depend on the size of the paint booth and the type of paint booth. There are two primary ways air flow is calculated in a paint booth. For a cross draft design paint booth air flow is calculated by the height and width of the booth x 100 feet per minute which gives you the CFM of the booth. Air Conditioning Paint Booths - A Guide - Pittsburgh Spray Sizing spray paint booths. The spray paint booth

size is directly related to its operational cost. Keep in mind that the fans and motors used for supply and exhaust are the greatest operational costs of a spray booth, which have a number of design options to consider. Spray Booth Design Elements - Size - Paint Booths Paint Booth Design Review Checklist ACGIH Industrial Ventilation Manual, 27th /28th Edition UFC 3-410-04N, Industrial Ventilation, 25 October 2004 ANSI Z9.3-2007, Spray Finishing Operations - Safety Code for Design, Construction, and Ventilation 29 CFR 1926.57, Ventilation 29 CFR 1910.94, Ventilation Paint Booth Design Review Checklist - United States Army The finisher should work within the front line of the paint booth, except on bench-type or open-face spray booths. Standard auto refinish paint booths range from 24 to 30 feet in length, including prep stalls. For specialty applications, such as used car refurbishment, tunnel booths can range from 40 to over 100 feet in length. Sizing the Booth - Finishing Academy Paint Booth Air Flow Designs.
