## Where To Download PennDOT Guide Rail Standards

• PennDOT Guide Rail Standards •  
• Avoid short gaps between guide rail installations by making guide rail continuous where the points of need are determined to be about 200 feet apart or less. • Consider keeping the slope clear of fixed objects when guide rail is not required due to the height of the slope. • Consider guide rail in sensitive areas such as Roadside Safety Pocket Guide - PennDOT Home guide rail, is reduced to 70km/h (45 mph) and 4000 ADT. Turned-down treatments cannot be used on the NHS regardless of speed or volume. Any comments or questions on the new Edition relative to revisions, Metric or English numbers, may be directed
