### **Coronavirus Disease 2019 (COVID-19): Emerging and Future**

B. Back – The human back is the large posterior area of the human body, rising from the top of the buttocks to the back of the neck and the shoulders. It is the surface of the body opposite from the chest. The vertebral column runs the length of the back and creates a central area of recession. The breadth of the back is created by the shoulders at the top and the pelvis at the bottom.

### **LABORATORY BIOSAFETY MANUAL - WHO**

Based on findings of genetic and epidemiologic research, it appears that the COVID-19 outbreak started with a single animal-to-human transmission, followed by sustained human-to-human spread (Chan et al. 2020; Del Rio and Malani 2020). It is now believed that its interpersonal transmission occurs mainly via respiratory droplets and contact transmission (The Chinese Preventive Medicine

### **Preventive Medicine Second Edition Revised**

This web-based revision of the second edition is the first step in the preparation of a third edition, planned for publication in 2003. The new publication will combine the Laboratory biosafety manual, 2nd ed. (revised) and the contents of the document entitled Safety in health-care laboratories<sup>1</sup>.
