SDOF elastic-plastic models can be

developed by employing a statistical equivalent linearization method as a response simulator of the original elastic-plastic model. The power and the intensity of the excitations are constrained in the critical excitation problem. Random Vibration - an overview | ScienceDirect Topics For vibrations of nonlinear systems due to random loads, statistical linearization has been widely used since it was first proposed; see, for instance, Caughey, Iwan, Spanos and Iwan, and Roberts and Spanos.
