Stoichiometry Review Study Guide

Answer Stoichiometry The study of the measurable relationships that exist in chemical formulas and reactions. The study of the amount of substances consumed and produced in a chemical

reaction. Stoichiometry Review Flashcards |

Quizlet Stoichiometry The study of quantitative relationships between the amounts of reactants used and amounts of products formed by a chemical reaction is called stoichiometry. Stoichiometry is based on the law of conservation of mass. Recall from Chapter 3 that the law states that matter is neither

created nor destroyed in a chemical reaction. Chapter 11: Stoichiometry Stoichiometry The mass relationships of elements in compounds and the mass relationship between reactants and products in the balanced chemical equations.
