Science SLS is a foaming agent used in dish soaps, liquid laundry detergents, toilet-bowl cleaners, shampoos and in the majority of all toothpastes. It is an irritating substance and may be responsible for oral ulcerations. Triclosan is an antibacterial agent whose use has become widespread in toothpastes, cosmetics and plastics. Oral Science | X-PUR Remin In van Loveren C (ed) Toothpastes (Monographs in Oral Science). pp 1-14. Basel: Karger, 2013. 5. Walsh T, Worthington H V, Glenny A M, Appelbe P, Marinho V C, Shi X. Fluoride toothpastes of... Fluoride in toothpaste - is the expressed total fluoride ... Later chapters provide valuable information on the abrasiveness of the pastes, the substantivity of active ingredients in the oral cavity and the possible models to study the effectiveness of the pastes when full-scale clinical trials are not possible. The final chapter focuses on the frequency of toothbrushing and post-brushing rinsing behavior. Toothpastes C.VAN LOVEREN Karger - 9783318022063 Experimental studies have demonstrated that tooth abrasion can be influenced by a number of factors, including not only the physical properties of the toothpaste and toothbrush used but also patient-related factors such as toothbrushing frequency and force of brushing. The role of oral hygiene: does toothbrushing harm? Toothbrushing with fluoride toothpastes has been pointed out as one of the factors responsible for the decline in dental caries in high 3 and medium-income countries, such as Brazil. 10 Besides that, the use of toothpastes may be considered the most rational method of fluoride use, because at same time that brushing promotes dental biofilm (dental plaque) disorganization, fluoride

concentration is increased in the oral cavity. 12 Nonetheless, fluoride must be chemically compatible in the ... Necessity to review the Brazilian regulation about ... Get this from a library! Toothpastes. [Cor van Loveren;] -- With the mass-marketed introduction of fluoride in toothpaste in the 1950s, toothbrushing with paste became indispensable for good oral health. Both the industry and the dental profession had a ... Toothpastes (eBook, 2013) [WorldCat.org] The toothpastes with SnF₂/NaF and TiF₄/NaF showed the best results in the reduction of enamel wear (62–70%) as well as TiF₄, SnF₂, SnF₂/NaF, and TiF₄/NaF for dentin wear (64–79%) (P < 0.05). Therefore, the experimental toothpastes containing both conventional and metal fluoride seem to be promising in reducing tooth wear. Effect of NaF, SnF₂, and TiF₄ Toothpastes on Bovine Enamel ... Toothbrushing with fluoride toothpastes has been pointed out as one of the factors responsible for the decline in dental caries in high 3 and medium-income countries, such as Brazil. 10 Besides that, the use of toothpastes may be considered the most rational method of fluoride use, because at same time that brushing promotes dental biofilm (dental plaque) disorganization, fluoride concentration is increased in the oral cavity. 12 Nonetheless, fluoride must be chemically compatible in the ...
